

C U R R I C U L U M V I T A E

Joseph B. Grand

September 14, 2011

Born

3 September 75, Boston, Massachusetts

1993-1997

B.S., Computer Engineering, Boston University, College of Engineering, Boston, Massachusetts.

1993-2000

Director and Design Engineer, L0pht Heavy Industries, Watertown, Massachusetts.

1995-2000

Electrical Engineer, Design Continuum, West Newton, Massachusetts.

2000-2002

Co-Founder and Research Scientist, @stake, Cambridge, Massachusetts.

2007-2008

Co-Host and Electrical Engineer, Prototype This, Discovery Channel, Silver Spring, Maryland.

2010

Hon.DTech, University of Advancing Technology, Tempe, Arizona.

2003-present

President, CEO, and Principal Electrical Engineer, Grand Idea Studio, San Francisco, California.

OUTSIDE BOARDS

2004-present

Technical Advisory Board, MAKE Magazine (O'Reilly Media), Sebastopol, California.

PRODUCT PORTFOLIO

- (Q1) A.T. Cross iPen : Battery-powered electronic stylus and drawing tablet for use with a desktop PC, Contributed to the final design modifications of the pre-production units, June 1997.
- (Q2) FluidSense FS-01 Infusion Pump : Handheld, battery-operated infusion pump that integrated security, precision fluid control, data collection, infrared data transfer capabilities, and a 96-hour battery life, Co-designer, Featured in Inventions 2000 section, Time Magazine pg. 80, December 4, 2000.
- (Q3) Bio-Rad Moto Alpha Motorized Heated Lid : Motorized, heated lid unit for Bio-Rad's popular line of DNA Engine Thermal Cyclers including automated lid control and accurate pressure sensor feedback, Co-designer, December 2000.

- (Q4) pdd : Memory imaging tool for forensic analysis of Palm-based PDAs, November 2001.
- (Q5) Redemption 5200 : Videogame controller adapter which allows the use of Atari 2600, Atari 7800, Sega Genesis, and PC controllers on the Atari 5200, July 2003.
- (Q6) thesmartgolfer Laser Putting Alignment System : Laser training aid for golf putting providing instant feedback on targeting, clubface orientation, and the ball impact zone, September 2003.
- (Q7) Emic Text-to-Speech Module : Fully integrated unit that converts a stream of digital text into a high-quality English-speaking voice, September 2003.
- (Q8) Stelladaptor : Atari 2600 controller-to-USB interface, Allows classic-style joysticks, paddles, and driving controllers to be used on modern PCs, March 2004.
- (Q9) Safety 1st SmartLight Stair Gate : Child safety gate containing motion-activated lights that illuminate the stairway and landing upon approach, Developed the initial proof-of-concept prototype, August 2004.
- (Q10) Ultra SCSIcide : Cartridge-based video game for the Atari 2600 VCS console, April 2005.
- (Q11) Parallax RFID Reader Module, Serial Interface : Low-cost module for radio frequency identification (RFID) applications, Reads 125kHz passive RFID tags from up to four inches away, May 2005.
- (Q12) Atari FlashBack 2 Classic Game Console : Dedicated console with 40 built-in games, Modeled after the 1977 release of the Atari 2600 Video Computer System (VCS), Developed the paddle detection algorithms used in selected games, August 2005.
- (Q13) StenoCast X7 : Bluetooth-enabled device that provides realtime, point-to-multipoint transmission of a court reporter's transcription data, September 2005.
- (Q14) Gamecaster Cybercam S2 Controller : Revolutionary camera that connects to live multiplayer video game matches, enabling pro-sports cameramen to shoot the virtual action from "within" the game, December 2005.
- (Q15) DEFCON 14 Conference Badge : Event badge for the largest and oldest continuously running hacker and computer security convention in the world, Contains active electronics mounted on an artistically designed printed circuit board, August 2006.
- (Q16) chumby : Wi-Fi enabled content delivery device designed to be used around the home to display real-time, user-customizable information, August 2006.
- (Q17) Parallax GPS Receiver Module : Low-cost module for global positioning system (GPS) applications, September 2006.
- (Q18) DEFCON 15 Conference Badge : Event badge for the largest and oldest continuously running hacker and computer security convention in the world, Contains active electronics to scroll custom text messages on a 95 LED matrix, Other features include capacitive sensing buttons and support for accelerometer and wireless functionality, Top Ten Finalist of the Freescale Black Widow Design Challenge, August 2007.
- (Q19) Perseus Athletics Posture-Tek : System and mechanism to detect and silently alert the user when poor posture occurs, Designed to ensure proper, user-defined posture during exercise or everyday life, December 2007.
- (Q20) DEFCON 16 Conference Badge : Event badge for the largest and oldest continuously running hacker and computer security convention in the world, Contains active electronics to transmit and receive data via infrared, Other features include SecureDigital memory card support, LED animations, and artistic elements, August 2008.
- (Q21) Parallax RFID Reader Module, USB Interface : Low-cost module for radio frequency identification (RFID) applications, Reads 125kHz passive RFID tags from up to four inches away, Easy connection to PC or Macintosh via bus-powered USB interface, August 2008.

- (Q22) DEFCON 17 Conference Badge : Event badge for the largest and oldest continuously running hacker and computer security convention in the world, Contains active electronics to affect the state of a multicolor LED based on audio input, Other features include multi-badge communication and artistic elements, July 2009.
- (Q23) AVRSimon : Educational kit designed to introduce students to electronics, soldering, and hands-on assembly, February 2010.
- (Q24) Parallax RFID Read/Write Module : Low-cost module for radio frequency identification (RFID) applications, Reads and writes 125kHz passive RFID tags with support for up to 116 bytes of user data storage and optional security features, March 2010.
- (Q25) DEFCON 18 Conference Badge : Event badge for the largest and oldest continuously running hacker and computer security convention in the world, Contains active electronics mounted on an artistically designed, aluminum substrate, laser engraved printed circuit board, Features include a miniature liquid crystal display (LCD), USB connectivity, seamless power switching, and hidden functionality for a variety of contests held at the conference, July 2010.
- (Q26) Laser Position Sensor Module : Optical sensor that measures and provides the two-dimensional coordinates of visible red laser light shined onto its surface, August 2010.
- (Q27) Mobile Monitor Technologies Field Monitor Pro / Monitor2Go : The world's first clamshell portable monitor that provides an immediate secondary display through a simple USB connection, August 2010.
- (Q28) Laser Range Finder Module : Low-cost distance measuring instrument that uses laser light and a camera to determine distance to a targeted object, September 2011.

Hobbyist and experimental products not included.

PATENTS

- (I1) U.S. Patent No. 7,181,560: Method and Apparatus for Preserving Computer Memory Using Expansion Card

Inventor(s):

Grand; Joseph (Brookline, MA)
Carrier; Brian (Bow, NH)

Issued/Filed Dates:

Feb. 20, 2007 / Dec. 21, 2001

- (I2) U.S. Patent No. 7,403,220: Apparatus, Methods, and Systems for Viewing and Manipulating a Virtual Environment

Inventor(s):

MacIntosh; David (San Diego, CA)
Morelock; David M. (Santee, CA)
Grand; Joseph (San Diego, CA)

Issued/Filed Dates:

Jul. 22, 2008 / Aug. 23, 2004

- (I3) U.S. Patent No. 7,249,846: Eyewear with an Image Projected off of an Unassisted Eyewear Lens to the User

Inventor(s):

Grand; Joseph B. (San Diego, CA)
Morelock; David M. (Kenmore, WA)
Manalo; Gil David (Redmond, WA)
Cruz; Ricardo Antonio (San Diego, CA)

Issued/Filed Dates:

Jul. 31, 2007 / May 3, 2005

(I4) U.S. Patent D592,678: Audiovisual Device

Inventor(s):

Adler; Steven M. (San Diego, CA)
Grand; Joseph B. (San Francisco, CA)
Huang; Andrew S. (Cardiff-by-the-Sea, CA)
Maxwell; Duane S. (San Diego, CA)
Meyerhoffer; Thomas Erik (Montara, CA)
Steele; Kenneth E. (Del Mar, CA)
Tomlin; Stephen L. (San Diego, CA)

Issued/Filed Dates:

May 19, 2009 / May 19, 2008

Patent applications not shown.

- (M15) Kingpin (Grand J) : DS1991 MultiKey iButton Dictionary Attack Vulnerability, @stake Security Advisory, January 18, 2001.
- (M16) Briefed the United States Special Assistant for Global Affairs, National Coordinator for Security and Counterterrorism, and Special Advisor for Cybersecurity on discovered security weaknesses of PDA devices. Resulted in governmental policy changes regarding the use of PDAs for sensitive information storage, January 2001.
- (M17) Nominated for the Boston University College of Engineering Outstanding Alumni Awards. Presented annually to recognize the accomplishments of the College's graduates. Nomination sponsored by Professor Michael F. Ruane, February 9, 2001.
- (M18) Kingpin (Grand J) : Security in Hardware/Electronics Design, Guru Is In Session, USENIX Annual Technical Conference, Boston, Massachusetts, June 29, 2001.
- (M19) Programming the Atari 2600, Panelist, Classic Gaming Expo, Las Vegas, Nevada, August 12, 2001.
- (M20) Guest speaker, Ecole Bilingue: The French-American International School of Boston, Discussion of computer security, technology, and privacy issues, Cambridge, Massachusetts, May 13, 2002.
- (M21) Classic, Current, and Future Videogame Development, Panelist, PhillyClassic 4: The East Coast Classic Gaming Event, Philadelphia, Pennsylvania, March 29, 2003.

- (M22) Programmer's Roundtable, Panelist, PhillyClassic 5: The East Coast Video Gamer's Event, Philadelphia, Pennsylvania, March 21, 2004.
- (M23) Received Honorable Mention for "Tribble: A hardware forensics tool for memory image retrieval" product concept at the 2004 Invent Now America! Exposition, an invention search aimed to discover outstanding examples of the ingenuity present throughout all facets of society, March 2004.
- (M24) Northcutt S : IT Ethics Handbook: Right and Wrong for IT Professionals, Special Contributor, Wrote sidebar opinion pieces entitled "Don't Believe Everything You Hear" and "Don't Be Afraid to Attack Your Own Network (or Products)", June 2004.
- (M25) Provided comments and research to help form the National Institute of Standards and Technology Special Publication 800-72, Guidelines on PDA Forensics, which was developed to help organizations evolve appropriate policies and procedures for dealing with PDA forensics and to provide forensic specialists with a background on the technology, tools, and principles involved, August 2004.
- (M26) Adjunct Professor, University of Advancing Technology, Tempe, Arizona, October 2004.
